**TO WHOM IT MAY CONCERN**

Re: Abdallah Salim

Abdallah underwent surgical intervention following a major and severe diabetic foot attack. Due to this, he underwent severe surgical toilet in theatre and as a result, he lost part of his fore foot which led to a non-functioning structured foot. He was then brought to Nairobi for a specialised podiatric surgical treatment to fix his dysfunctional foot.

Since then, he's had to undergo more surgical exploratory surgery with VAC assisted closure dressings. Please understand, due to severity of his condition, he is now undergoing a series of VAC treatment and specialised wound and ulcer management in whatever form that may take to save his foot.

Do not hesitate to call our office should you need further information.

Yours Faithfully,

Fabian Collis
